TO TURN ON THE SYSTEM:

PRESS ANY PRESENTATION SOURCE BUTTON ON THE TOUCH SCREEN.

✓ When a button is blinking, the system is warming up.*
✓ The screen will lower when a source button is pressed.
✓ When a button stops blinking, that source is ready to use.

*It may take up to three minutes for the system to warm up. Please be patient.
You may need to press the black button under the screen to view the touchscreen.

Please remember to turn off the system when you are done using it.

✓ Once the system is turned off, it will take approximately 3 minutes for the cool-down cycle to complete.
✓ Since it is not possible to restart the system until this cycle is complete, use VIDEO MUTE if you plan to use the system again during your class period.
✓ To ensure that the auto-shutdown feature does not interrupt your class, press any source button at the start of your class. The auto-shutdown feature shuts the system off after 4 hours without a system selection.

For additional assistance or to set up an equipment training session, please call the Classroom Support Hotline at 612-625-1086 or email ocmhelp@umn.edu.

**Connecting a Laptop**

- The standard cables are located in the pocket of the instructor station. You may need to flip up a cover to access the cables.

1. Connect the VGA or HDMI cable to the laptop **before** you turn on the laptop. Be sure to align the cable with the port and **push it in straight**, taking care to not bend the pins.

**Please note:** Some **Apple laptops** have a DVI (or mini-DVI) port, rather than the standard HDMI or VGA port. **To use the projection system, you will need to use an adapter** to connect your computer to the laptop cable. If you do not have an adapter, you can purchase one at the U of M Bookstore. OCM does not supply adapters in classrooms.

2. Connect the thin audio cord into the **headphone** jack of your laptop (not the microphone jack).

3. Turn the touchscreen on using the black button under the screen. Press the “VGA LAPTOP” or “HDMI LAPTOP” source button on the touch panel (depending on which cable you use).

4. When the button stops blinking, start the laptop.

**If the laptop image does not appear, activate the external display:**

**For PC (Windows-based) Laptops:** To activate the external display, you must press and **hold the Function key** (labeled “Fn”); while holding down the “Fn” key, press the appropriate secondary key (as noted in the chart at right). The image should appear on the screen.

**For Mac (Apple) Laptops:** To activate the external display, open “System Preferences” on your laptop. Click on “Displays,” then “Detect Displays.” The image should appear on the projection screen.

---

**Laptop Tips**

**If you need to adjust the laptop volume:**

- Increase the system volume by using the volume up/down buttons on the touch screen.

  - If you cannot hear any audio, verify that the "Audio Mute" button on the system control panel is not on. **When this button is selected, the audio will not play.**

  - You can also increase the volume by adjusting the volume on the laptop itself (using the laptop’s control panel). If that does not work, verify that the laptop’s mute button is not selected.

---

**If the image is distorted, or you see an error message that indicates “Frequency Out of Range”:** You may need to adjust the monitor resolution.

- **For PC Laptops:** From the Start Menu, open the Control Panel and double-click on the “Display” icon. Select the “Settings” tab, and adjust the screen resolution to **1024 by 768 pixels**.

- **For Mac Laptops:** Open “System Preferences” on your laptop. Click on “Displays,” and in the “VGA Display” window select “**1024 x 768, 60.0 Hz**” from the list.
Using the DVD/VHS Combination Unit

1. Turn the touchscreen on using the black button under the screen. Press the button marked “DVD/VHS Player” on the main touch screen (located on the instructor station). When the button stops blinking, the system is ready for use.

2. Insert your DVD, CD, or VHS tape.

3. Press the “DVD/VHS Controls” button (on the main touch screen) to access the standard controls.

4. From the “DVD/VHS Controls” screen, press the appropriate source button (“VHS” or “DVD”).

5. Use the Transport Controls on the touch screen to control the player. To activate the closed captioning, press the “Closed Captioning” button. Please note: When playing a DVD, if the captions do not appear, you may need to activate the closed captioning on the DVD’s menu of options (using the DVD Navigation controls—circled on the image above).

6. To return to the main menu, press “Escape.”

Using the Auxiliary Video (for External Devices)

To connect an external video playback device, you will need to provide the appropriate AV cable (with yellow, white, and red connectors).

- Connect the AV cables to the output jacks on the device and to the input jacks on the front of the VHS/DVD combo player. Use the channel up/down buttons on the front to set it to “Line Input.”
- The combo player display should read “F-1” or “L-1.” Select the “DVD/VHS Player” source.

Using Projector Aspect Ratio Controls

The aspect ratio controls offer several different options to display content on the classroom’s widescreen projector.

If you do not select any aspect ratio options:

- When displaying a computer screen, the projector will attempt to match the computer display settings.
- When displaying a video,
  - VCR: the projector will display standard 4:3;
  - DVD: projector will attempt to match settings encoded on the DVD.

If the display is distorted, employing aspect ratio controls may help correct the distortion:

- Press the button marked “Projector Aspect Ratio Controls” on the main touch screen (located on the instructor station).
- Follow the guidelines describing the type of signal to be displayed and choose a setting or “Auto Set Up.”
- Read the setting descriptions when you press “Aspect Ratio Help” for assistance in choosing an option.
- Press the Escape button to return to the main screen.
Using the Wireless Microphone

1. Clip the microphone mouthpiece to your shirt, about 3 inches directly below your chin.

2. Turn on the microphone transmitter. The ON/OFF switch will be on either the top or the front of the transmitter (depending on the model).

**Please remember to turn off the wireless microphone after use.**

Wireless Microphone Tips

**If the microphone is not working:**
First try changing the batteries.

✔ Spare batteries are kept in either the drawer with the microphone, or in the pocket of the instructor’s podium.

✔ If you use the last set of spare batteries, or if changing the batteries does not solve the issue, please call the Classroom Support Hotline at 612-625-1086.

**If the volume is too low/high:**
Adjust the placement of the mouthpiece on your shirt.

✔ The microphone volume is optimized for the classroom and is not user adjustable.

✔ The “AUDIO MUTE” button will not mute audio from the microphone. To mute the microphone audio, simply turn the microphone off.

Using the Overhead Projector

1. Verify that the projector is plugged into a power outlet.

2. Turn on the projector power switch.

3. Turn the knob on the lens column to adjust the focus.

4. Turn off the power when you are finished using the projector.

Overhead Projector Tip

**If the projector lamp burns out:**
Switch to the alternate lamp.

Each overhead projector contains two lamps. If the primary lamp is out, you can switch to the alternate and continue using the projector:

1. Turn off the power to the projector.

2. Locate the flip-up door on the front corner of the projector. To switch to the alternate lamp, lift up on the flip-up door and turn the knob to the other lamp indicated (either “1” or “2”).

3. Close the flip-up door tightly.

4. Turn the power back on. The alternate lamp should now be functioning.

**Overhead Projector Tip**

**If the projector is on but does not project any light:**
Verify that the flip-up door is closed tightly.

✔ If you can hear the fan of the projector running, but the machine is not projecting anything, verify that the flip-up door is closed tightly (see #2 and #3 at right). The lamps will not illuminate if the door is ajar.

If both lamps are burned out, please call the Classroom Support Hotline at 612-625-1086. We will dispatch a technician to replace the lamp as soon as possible.
Using the U of M Network

To Connect to the Wired Network:
Simply connect the Ethernet cord (in the pocket of the instructor station) to the Ethernet jack on your laptop.*

*Please note: You will need to register and setup your computer for DHCP Service (Dynamic Host Configuration Protocol) prior to using the Ethernet connection.

To Connect to the Wireless Network:
Simply open a web browser (e.g., Internet Explorer, Firefox, Safari). You will be prompted to log in with your U of M Internet ID (X.500) and password.

Wireless Network Tips

If the Connection is Slow or Does Not Work Properly:
Verify that you are connected to the “UofM” connection.

☑ There may be other wireless network connections within range of the classroom. Connecting to a non-U of M network may cause the connection to be slow or not work properly.

If You Do Not Have a U of M Internet ID:
Guests to campus may use the "UofM Guest" network for free.

☑ For more information about obtaining guest access to the U of M network, please visit the following website:
http://www.oit.umn.edu/wireless/guest-access/index.htm

Wired Network Tips

Understanding DHCP:

☑ Once registered and set up, DHCP allows you to automatically connect to the network on any campus classroom Ethernet jack.

☑ DHCP registration should be done in advance of the time you need to use the network, as the registration confirmation process may take several minutes.

☑ DHCP registration can be done online at:
http://www.oit.umn.edu/network/setup-guides/

Data network service and support is provided by the Office of Information Technology. For further assistance with the wireless or wired network connection, please call the I-HELP Technology Helpline at 612-301-4357.

For additional assistance, call or email the Classroom Support Hotline:
612-625-1086 or ocmhelp@umn.edu
