To turn on the system, press any button on the Control Panel (other than the “System Off” button).

When a “Source” button is blinking, the system is warming up.*

When the button stops blinking, that source is ready to use.

*It may take up to three minutes for the system to warm up. Please be patient.

Please remember to turn off the system when you are done using it.

- Once the system is turned off, it will take approximately 3 minutes for the cool-down cycle to complete.
- Since it is not possible to restart the system until this cycle is complete, use VIDEO MUTE if you plan to use the system again during your class period.
- To ensure that the auto-shutdown feature does not interrupt your class, press any source button at the start of your class. The auto-shutdown feature shuts the system off after 4 hours without a system selection.

To switch between sources:
Press the Source button of the item you wish to display.

When the button stops blinking, the source is ready to use.

For additional assistance or to set up an equipment training session, please call the Classroom Support Hotline at 612-625-1086.

The University of Minnesota is an equal opportunity educator and employer. This publication is available in alternative formats upon request. Direct requests to ocmhelp@umn.edu. Printed on recycled and recyclable paper with at least 10 percent postconsumer material.
**CONNECTIONS A LAPTOP**

1. The standard cables are located in the pocket of the instructor station.

2. Connect the VGA cable to the laptop before you turn on the laptop. Be sure to align the cable with the port and push it in straight, taking care to not bend the pins.

   **Please note:** Some Apple laptops have a DVI (or mini-DVI) port, rather than the standard VGA port. To use the projection system, you will need to use an adapter to connect your computer to the laptop cable. If you do not have an adapter, you can purchase one at the U of M Bookstore. OCM does not supply adapters in the classrooms.

3. Connect the thin audio cord into the **headphone** jack of your laptop (not the microphone jack).

4. Press the “Laptop” button on the control panel. When the button stops blinking, start the laptop.

   ✓ Activate the external display:

   **For PC (Windows-based) Laptops:** To activate the external display, you must press and hold the Function key (labeled “Fn”); while holding down the “Fn” key, press the appropriate secondary key (as noted in the chart at right). The image should appear on the projection screen.

   **For Mac (Apple) Laptops:** To activate the external display, open “System Preferences” on your laptop. Click on “Displays,” then “Detect Displays.” The image should appear on the projection screen.

---

**LAPTOP TIPS**

**IF YOU NEED TO ADJUST THE LAPTOP VOLUME:**
Increase the system volume by using the Program Volume controls on the control panel.

 ✓ If you cannot hear any audio, verify that the "Audio Mute" (accessible from the Program Volume menu) is not on. When Audio Mute is on, the audio will not play.

 ✓ You can also increase the volume by adjusting the volume on the laptop itself (using the laptop’s control panel). If that does not work, verify that the laptop’s mute button is not selected.

**IF THE IMAGE IS DISTORTED, OR YOU SEE AN ERROR MESSAGE THAT INDICATES “FREQUENCY OUT OF RANGE”:**
You may need to adjust the monitor resolution.

 ✓ **For PC Laptops:** From the Start Menu, open the Control Panel and double-click on the “Display” icon. Select the “Settings” tab, and adjust the screen resolution to **1024 by 768 pixels**.

 ✓ **For Mac Laptops:** Open “System Preferences” on your laptop. Click on “Displays,” and in the “VGA Display” window select “1024 x 768, 60.0 Hz” from the list.

**Using the VHS Player**
1. Press the button marked “VHS” on the control panel (located on the instructor station).
2. When the button stops blinking, the system is ready for use.
3. Insert your videotape and use the buttons on the front panel of the VHS player to control the player.

**Using the Auxiliary Video (for External Devices)**
The data/video projector is capable of displaying audio and video from a variety of user-provided external devices (including portable DVD players, iPods, and more) using the VHS player. To connect an external video playback device, you will need to provide the appropriate AV cable (with yellow, white, and red connectors).
1. Connect the AV cables to the output jacks on the device and to the input jacks on the front of the VHS player.
2. Use the channel up/down buttons on the front of the VHS player to set it to “Line Input.” The VHS player display should read “F-1” or “L-1.”

**Using the DVD Player**
1. Press the button marked “DVD” on the control panel (located on the instructor station).
2. When the button stops blinking, the system is ready for use.
3. Insert your DVD or CD and use the buttons on the front panel of the DVD player to control the player.

**If the DVD Image is Freezing or Distorted:**
- Remove the disc from the player & check the disc for damage.
- Clean the disc (to remove smudges or fingerprints).

**Using Projector Aspect Ratio Controls**
The aspect ratio controls offer several different options to display content on the classroom’s widescreen projector. If you do not select any aspect ratio options:
- When displaying a computer screen, the projector will attempt to match the computer display settings.
- When displaying a video,
  - VCR: the projector will display standard 4:3; DVD: projector will attempt to match settings encoded on the DVD.

**If the display is distorted, employing aspect ratio controls may help correct the distortion:**
- Press the button marked “Projector Aspect Ratio Controls” on the control panel (located on the instructor station).
- Allow the system to adjust to a new setting. If the new display is still distorted, press the button again.
- More information is available in the Widescreen Aspect Ratio guide at: [http://www.classroom.umn.edu/support/AspectRatio.html](http://www.classroom.umn.edu/support/AspectRatio.html)

**To use closed captioning (DVD & VHS):**
To activate the closed captioning, locate the “Closed Captioning” switch near the VHS and/or DVD player. Flip the switch to the “ON” position.

**Please note:** When playing a DVD, if the captions do not appear, you may need to activate the closed captioning on the DVD’s menu of options.
**Using the Wireless Rechargeable Microphone**

1. Remove the mic from the charging base (located at the front of the side drawer of the instructor station) and clip the microphone to your shirt, about 3 inches directly below your chin.

2. Unmute the microphone by pressing the side button.

**RETURN THE RECHARGEABLE MICROPHONE TO THE CHARGING BASE AFTER USE.**

**Wireless Rechargeable Microphone Tips**

**If the Microphone is not working:**
First try using the second microphone.
- If the microphone is not charged, (indicated by a blinking yellow/green light) return it to the charging base and use the second microphone.
- If the second microphone is not available, please call the Classroom Support Hotline at 612-625-1086 for assistance.
- Please note: the rechargeable microphones do not have volume adjustment.

**Microphone Indicators and Alerts:**
- If the microphone leaves the immediate vicinity of the classroom, the unit will turn off and emit an alarm beep to alert you to return the microphone to its charging base.
- The LED indicator light on the top of the microphone will indicate its status:
  - If it is **blinking red**, press the side button to unmute it.
  - If it is **green**, the microphone is charged and on.
  - If it is **blinking yellow/green**, the battery is low.
  - If it is **solid red**, the microphone is usable but not fully charged.
  - If it is **blinking with any other combination of colors**, there is a problem with the microphone.

**Using the Document Camera**

1. Open the door on the right side of the lectern and pull out the drawer containing the document camera.

2. Unfold the camera head and side lamps.

3. Be sure that the top of the camera head is aimed directly down.

4. Press the “DOCUMENT CAMERA” button on the control panel. When the button stops blinking, the system is ready for use.

**Document Camera Tips**

**Showing Transparent vs. Opaque Materials:**
- Use the “LAMP” button to adjust the light source. Each time you press the button, it cycles through these settings: upper lamps on, lightbox on, and all lightings off.
- When using transparencies or slides, change the light source to “lightbox on” (this will backlight the object from the white box in the center of the document camera).
- When using opaque objects, change the light source to “upper lamps on.” Adjust lamps so the light is directed at the object.

**If the Image Color or Brightness is imbalanced:**
- You can automatically adjust the color by placing a white piece of paper under the lens and pressing the “AWC” (Auto White Color) button on the document camera.
- Use the “IRIS +/-” buttons on the document camera to adjust brightness.

**To re-size the image:**
- Use the “ZOOM +/-” button to reduce or enlarge the image size.

**If the Image is Blurry:**
- Use the “APERTURE” button to control image sharpness. For images with mostly text, turn the aperture ON. For images with many pictures or colors, turn aperture OFF.
- Use the “AF” button to automatically focus the image.
Using the U of M Network

To Connect to the Wired Network:
Simply connect the Ethernet cord (in the pocket of the instructor station) to the Ethernet jack on your laptop.*

*Please note: You will need to register and setup your computer for DHCP Service (Dynamic Host Configuration Protocol) prior to using the Ethernet connection.

To Connect to the Wireless Network:
Simply open a web browser (e.g., Internet Explorer, Firefox, Safari). You will be prompted to log in with your U of M Internet ID (X.500) and password.

Wireless Network Tips

If the connection is slow or does not work properly:
Verify that you are connected to the “UofM Wireless” connection.

✓ There may be other wireless network connections within range of the classroom. Connecting to a non-U of M network may cause the connection to be slow or not work properly.

If you do not have a U of M Internet ID:
Guests to campus may use the “UofM Guest” network for free.

For more information about obtaining guest access to the U of M network, please visit the following website:
http://www.oit.umn.edu/wireless/guest-access/index.htm

Wired Network Tips

Understanding DHCP:
✓ Once registered and set up, DHCP allows you to automatically connect to the network on any campus classroom Ethernet jack.
✓ DHCP registration should be done in advance of the time you need to use the network, as the registration confirmation process may take several minutes.

DHCP registration can be done online at:
http://www.oit.umn.edu/network/setup-guides/

Data network service and support is provided by the Office of Information Technology. For further assistance with the wireless or wired network connection, please call the 1-HELP Technology Helpline at 612-301-4357.

For additional assistance, call or email the Classroom Support Hotline:
612-625-1086 or ocmhelp@umn.edu
